What does the Salesforce (SFDC) iBoT do?

Today CRM systems like Salesforce are becoming a mandatory part of organizations to run their business successfully. However, for managing any CRM software, companies have to allocate a large amount of resources to perform various repetitive tasks. This increase in the overall expenditure due to resource allocation stops many small businesses from taking advantage of CRMs. One of the most compelling ways to improve the overall effectiveness of Salesforce is by using intelligent automation. It is an ideal option enabling businesses to automate simple, repetitive, rule-based and high-volume tasks within the SFDC.

Salesforce (SFDC) iBoT from Perpetuuiti can streamline a plethora of processes, including creating new job, changing the job, creating a new case, closing the case, downloading the case list with provided inputs and so on. The iBoT basically logs in to the SFDC application and connects with Excel sheet to perform these tasks and many more.

How is Perpetuuiti's Salesforce iBoT Unique in the Market?

Our commitment to intelligent automation, easy integrations and non-intrusive deployments makes our Plug-and-Play intelligent BoTs unique in the market.

Streamline Key Tasks on Salesforce and Enjoy Benefits with Perpetuuti's Salesforce iBoT

Cost Reduction

By automating a considerable number of routine and non-revenue generating manual tasks related to Salesforce application.

Improved Efficiency

Human resources work for a particular time duration, but this iBoT can work 24*7 if needed. Moreover, it can also perform multiple & complex tasks at a single go.

Error Reduction

Data entry errors in Salesforce can happen because of human mistakes like lack of concentration or others. iBoT can perform these tasks at 100% accuracy.

Ease of Use

Easy to use and integrate into new or existing tasks without any technical supervision.

Seamless Integration

Quick and seamless integration with sales system..

Non-intrusive

Does not change the underlying logic or business rule – ensures data goes through the same rules for consistency with the applications' business rules and logic.

Setup Process

Prerequisites/ Inputs

- ⇒ Testing data to build the model such as Microsoft Excel, details of the job and all the business rules.
- ⇒ Other mandatory fields.
- ⇒ Hardware and Software requirements – Salesforce iBoT, Server and Av3ar Control Room as per the Av3ar prerequisite document.

Implementation

- ⇒ Download and Install the Salesforce iBoT, Server, and Av3ar Control Room in your environment (Read the Av3ar Installation guide).
- ⇒ Configure the Server and Bot Details
- ⇒ Map the workflow to the Job
- ⇒ Trigger the Job.
- ⇒ That's it - Now the bot is ready to get going.
